# 1 Internal Job Rotation

- Version 1.3
- Revision History

## 1. Objective

To strengthen our #Fit.CoolSWCompany culture, career development through talent mobility is integral for BGSW. Internal Job Rotation (IJR) is repurposed with greater autonomy for associates to contribute and explore opportunities to the fullest. This enables associates to craft their career moves by exploring opportunities across the organization.

## 2. Scope

Applicable to all BGSW associates interested in Internal Job Rotation.

## 3. Eligibility

Associates will be eligible to apply for IJR upon completion of 2 years in their current role before applying for a new role/profile, i.e., at the time of applying for IJR, associate should have completed at least 2 years in the current role.

Associates who have been deputed to Bosch locations abroad on assignment/training for a period greater than 6 months can apply for an IJR only after a period of double the period of deputation from the date of return /completion of such deputation.

## 4. Responsibility

The associate/hiring manager is responsible for the entire process of IJR. The IJR process will be supported by HRL-TA, HRBP and HRS-IN. The hiring manager is accountable for fulfilling the job position by promoting a culture of talent mobility.

## 5. Process

### 5.1 Publish Job Requirements

5.1.1 All positions should be mandatorily advertised on Talent Hub. This is applicable for all levels (including SL1 and SL2).

For SLx, all positions including replacements, new positions and positions where successor may be planned will be first posted on the internal job portal. Jobs should be posted for 2 weeks for internal search via Talent Hub and then external sources can be used for filling the position. This is particularly with the objective to provide transparency in the internal job requirements and to support internal potential and associate development.

5.1.2 The hiring manager raises the requisition on Talent Hub. He adds the approver & HRL-TA to the requisition.

5.1.3 HRL-TA approves the position and adds the sourcing lead to publish the position.

5.1.4 The internal job requirements will be circulated through a special mail by recruitment process owner once in two weeks.

### 5.2 Application

5.2.1 Interested associates can apply for the published positions through Talent Hub.

© This is the exclusive property of BGSW/BGSV. Without their consent, it may not be reproduced or given to third parties. If printed, this document is an uncontrolled copy.

5.2.2 Associates found suitable by the hiring manager will be contacted by the HRL-TA via HRS-IN.

5.2.3 Associates can decide whether to inform their supervisor during the application process. Upon selection, associates are encouraged to discuss their transition plans with their supervisor and/or the sending HRBP. Supervisors need to support the IJR process. Any hindrance in process will be considered insupportable and it would not be encouraged.

### 5.3 Interview

5.3.1 Suitable candidates will be called for technical interview with the hiring manager.

5.3.2 HRS-IN (TA) will support in coordinating the interviews between the candidate & the hiring manager.

5.3.3 The hiring manager will document his feedback on all the candidates interviewed on Talent Hub. The candidates who are not selected will be notified via Talent Hub by HRS-IN(TA). This ensures that the process is transparent and fair.

### 5.4 Selection

5.4.1 For below SLx positions, the hiring manager communicates the selection to the candidate.

5.4.2 For SLx positions, the receiving HRBP should be a part of the interview. Post which the hiring manager communicates the selection to the candidate.

5.4.3 In order to bring fairness and remove bias from the selection process, due care should be taken while hiring immediate family members (brother, sister, spouse etc.) in the same department. Specific approval from BU HRBP is required. It is also to be ensured that family members will not be in the chain of reporting or have the same supervisor.

5.4.4 The selected candidate initiates the movement request in the IJR tool which is then approved by the hiring manager.

5.4.5 Alternatively, the hiring manager can also initiate the movement of the selected candidate in the IJR tool which is then acknowledged by the candidate.

5.4.6 An auto generated email is sent out to all stakeholders (hiring manger, receiving HoE, receiving HRBP, sending HoE, engineering manager/reporting manager and HRBP) with details of the selected candidate.

### 5.5 Movement

5.5.1 The movement to the new department should occur within 3 months, regardless of whether a successor is available.

5.5.2 The period starts from the time the movement request is initiated in the IJR tool.

5.5.2a For requests raised between 1$^{st}$ to 10$^{th}$ June, the effective date of IJR will be 1$^{st}$ September.

5.5.2b. For requests raised after 10$^{th}$ June, the effective date of IJR will be 1$^{st}$ October.

5.5.3 The IJR request is auto approved by the sending department.

5.5.4 The sending manager can advance the date of movement by mutual consensus.

5.5.5 Associate receives the IJR/transfer letter from the IJR tool.

5.5.6 In the event of the associate's withdrawal of the IJR request, the associate can place a request for cancellation via sending HRBP.

**Path to IJR tool: Employee services -> Associate applications ->Reorg tool ->IJR request**
